Opportunities to attend networking events Summer Drinks
Join us for an in-person opportunity for all members and partners within the UKPA to come together and network in a relaxed setting. An annual Summer event not to be missed!

Debates (LIMITED ACCESS)
Our in-persondebate series tackling the big questions on the future of the industry, the barriers to technology adoption, and the impact of technology.Limited availability per event, only 20 spaces allocated to individual members on a first come first serve basis and capped at one event per year for Individual Members. *To receive full access to the Debate programme, memberships must be upgraded to the gold package.*

EVENT THEMES 2023:

Theme 1: Data	**Theme 2:** ESG & Decarbonisation	**Theme 3:** Enabling Technology Adoption
Effective utilisation of data is an opportunity for the industry to make more efficient decisions BUT it also remains one of the top challenges the property industry is facing and a barrier to realising the true ROI of PropTech solutions.	Across the entire built environment, property companies are grappling with what ESG means for them and challenging targets to reduce the carbon footprint of the buildings they develop, own or manage.	Despite there being many examples of how PropTech can help the property industry with more efficient property management, the implementation process remains slow and getting internal buy in is challenging.
